

ARTHUR SOGHOYAN

SOFTWARE ENGINEER - BACKEND & AI INTEGRATION

Specialized in building robust backend architectures, automated data pipelines, and integrating AI models into production environments. Expertise in Python, Kotlin, and Cloud infrastructure (GCP/AWS) and developing reliable software pipelines (API design, cloud services, CI/CD)

EXPERIENCES AND PROJETS

(Internship) Algorithm Engineer | Stanley Robotics 2025 : 6 Months

- Development and integration of scoring algorithms and an autonomous housekeeping module to our **digital twin** model (**Python/Kotlin**)
- Flow prediction using ML models on **GCP (Python; BigQuery)**.
- Unit testing, CI/CD pipelines, local deployment via **Docker**, monitoring via **Kubernetes** and debugging via Datadog. (**Jenkins, Gitlab CI**).

(Work-study program) Backend Engineer | iSpheres 2022 - 2024

- **Architected backend HMI** and real-time IoT integrations using **Python**, multithreading, and version control. (**Git/Github**)
- Developed perception-oriented **signal processing (OpenCV, FFT)** and embedded communication protocols (**Ethernet, I2C, SPI**).
- Enforced high code quality through **Agile/Scrum** workflows, comprehensive **code reviews**, and **automated CI/CD**.

(Projects) School and Personal | 2022 - 2025

- **AutoApply - AI-Powered Recruitment Pipeline** (AWS, Docker, PostgreSQL, n8n, Puppeteer, LLM Integration)
 - Deployed a **cloud-native automation** engine on **AWS EC2** to source and analyze job offers in real-time.
 - Built a robust **data pipeline with PostgreSQL** deduplication and a "**Human-in-the-loop**" Telegram interface.
 - **Optimized AI inference costs** by 97% by implementing targeted data cleaning before **LLM processing**.
- **AI & Intelligent Systems - HandMotion3D & Robotics** (PyTorch, MediaPipe, Python, C++)
 - Developed an **AI system for 3D motion tracking** using **PyTorch** and **MediaPipe** for real-time inference.
 - Engineered trajectory optimization **algorithms** and **cross-device communication** for robotic control systems.
 - Designed **digital twins** and simulations using **Matlab/Simulink** to model complex system behaviors.

HOBIES AND IMPLICATIONS

- Sports (Football, Tennis, Ping-pong)
- Tech, AI and Crypto News
- Chess Player on Competition (Elo 1700)
- Poker player

INFORMATIONS

- ☎ + 33 7 51 40 29 21
- ✉ soghoianarthur@gmail.com
- in soghoianarthur
- 📍 Paris 14

FORMATIONS

- (2024-2025) **ENS-ParisSaclay**
Second Degree in M2 Intelligent Systems
- (2021 - 2024) **Esme Sudria** :
Degree in Embedded Systems Engineering
- (2019 - 2021) **Prépa Mermoz Montpellier** :
Physics Technology (PTSI/PT)

COMPETENCES

Linux / Windows

- **Python, Kotlin**, Matlab, **SQL**, JavaScript.
- **GCP, AWS, Docker, Kubernetes, CI/CD (Jenkins, GitLab), PostgreSQL**
- **PyTorch, , OpenCV, NumPy, BigQuery**

LANGUAGES

Fluent (Speakin & Writing)

- Armenian
- French
- English
- Russian
